Overview

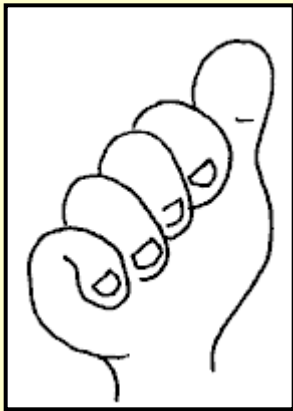

- 16th May date
 - Not many responses – only 8
- BUT**
- what we have had has been very positive
 - Some really helpful comments

Good things

- Everyone agreed with priorities
- People liked the fact that the document has lots of action – people actually seemed to like the level of detail!

Good things

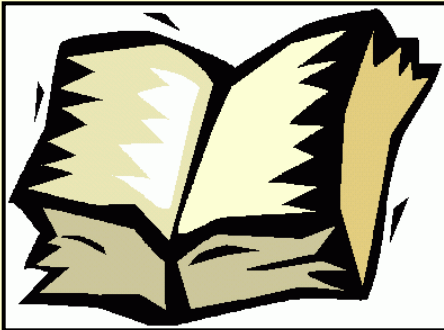

Comments included

- “Precise – not too much information - just enough to understand what it is about”
- “All your aims/themes and how you plan to go about doing them”
- “It sounds very constructive and hopefully it will make a difference to people lives”

- Too long

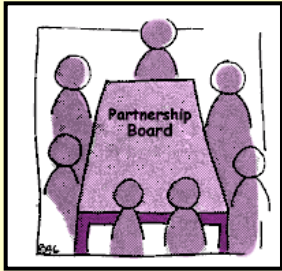

- Use full version as our workbook

Helpful comments

- Targeted summaries
- More work with people we need to get on board

Helpful comments

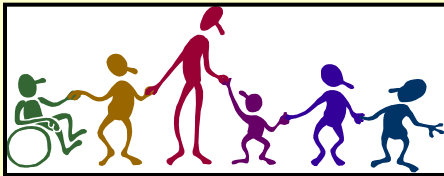

- We haven't addressed the fostering the "automatic attitude" (or culture) of partnership - we have concentrated on the practical side

Helpful comments

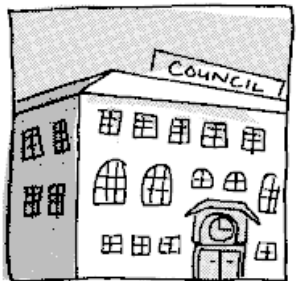

- We don't say exactly how we will develop indicators and how they will link with nationally and locally recognized measures
